PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 6+ years of experience in Angular, React, NestJS, Python (FastAPI, Django), PostgreSQL and REST APIs, building secure, scalable enterprise web applications in FinTech and Automotive. Delivered payment solutions for the NPCI Bharat Bill Payment System (BBPS), banking API integrations, automated reconciliation platforms and enterprise Dealer Management Systems. Experienced in VAPT-compliant development, performance optimization and leading distributed Agile teams across India and Malaysia.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, SCSS, RxJS, NgRx

Backend: Python (FastAPI, Django), NestJS, REST APIs, JWT, OAuth 2.0, RBAC

Databases and ORM: PostgreSQL, Redis, SQLAlchemy, Alembic

Real-Time: WebSockets, Socket.IO

DevOps and Cloud: Docker, Kubernetes, Jenkins, Git, Linux, Nginx, SonarQube, CI/CD

Testing and Security: Unit Testing, Integration Testing, VAPT Compliance

Methodologies: Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Simbiotik Technologies Sdn. Bhd. (via Simbiotik Solutions Pvt. Ltd., formerly Recstech Technology Pvt. Ltd.)

Petaling Jaya, Selangor, Malaysia | August 2023 - Present

Dealer Management System (DMS) - Automotive Enterprise Platform

- Led the full front-end redesign of a mission-critical DMS supporting 500+ global enterprise dealers for one of Asia's largest automotive manufacturers.
- Architected high-performance Angular applications, improving platform responsiveness by 40% and ensuring global system scalability.
- Integrated NgRx for advanced state management, reducing client-side memory overhead and eliminating data redundancy across platforms.
- Designed modular TypeScript UI components cross-functionally, cutting front-end development lead time for new features by 25%.
- Contributed to the QMS backend using Python FastAPI, REST APIs and PostgreSQL, supporting appointment, customer arrival, check-in, reception and queue-status workflows, and customer queue details displayed on TV screens.
- Implemented WebSocket-based real-time queue updates and role-based actions for Reception, Service Advisor and customer-facing TV displays, showing live queue and service details with Arrived, Checked-In, Attended, Cancelled and Cut Queue statuses.

Technical Team Lead / Full Stack Developer | Rhythm Flows Solutions Pvt. Ltd.

Pune, India | July 2021 - August 2023

Project 1: National Payment Gateway (NPCI-Compliant)

- Architected and delivered core business logic for a national Bharat Bill Payment System (BBPS) Biller-side solution, achieving 100% compliance with NPCI regulatory standards.
- Engineered high-concurrency payment processing pipelines by integrating complex Banking APIs, enabling real-time data exchange across multi-biller ecosystems.
- Accelerated third-party partner onboarding by 30% by designing a scalable FastAPI-based sandbox for integration testing and secure access.
- Managed complex client requirements and aligned technical milestones with regulatory deadlines across full-cycle FinTech delivery.

Project 2: Financial Reconciliation Engine

- Led full-stack development of an automated reconciliation solution in Python, achieving high-precision verification of complex financial records.
- Automated commission payment calculation and distribution for the Customer Operating Unit (COU), reducing manual processing time by over 40%.

Software Engineer | ModezTech Ingenious Pvt. Ltd.

Pune, Maharashtra, India | February 2020 - June 2021

E-Commerce Web Applications

- Built responsive, scalable e-commerce frontends using Angular and Django, translating complex client requirements into intuitive interfaces that improved user engagement and code maintainability.

PROJECTS

SettleUply | Angular 21, FastAPI, PostgreSQL, SQLAlchemy, Alembic

- Developed a full-stack personal finance platform for expenses, lending/borrowing, settlements, multi-currency ledgers, payment reminders and group expense splitting.
- Implemented JWT authentication, email OTP verification, RBAC, admin approval, user-level data isolation and secure OTP-protected read-only ledger sharing with expiring links.
- Built responsive dashboards, transaction/activity management, pagination, advanced filters, notification preferences and mobile-first interfaces.
- Live: <https://settleuply.rocketreach.in>

DevFlow | Angular 21, NestJS, PostgreSQL

- Building a Jira-inspired project management platform with JWT authentication, RBAC, project/task management, Kanban boards, comments and real-time collaboration using a scalable full-stack architecture.

Real-Time Chat Application | Angular, NestJS, Socket.IO

- Built a real-time messaging platform with Socket.IO, file sharing, reusable Angular components and instant notifications using WebSockets.

AI-Powered Virtual Assistant | Python, NLTK, SpaCy

- Developed an NLP-based desktop assistant capable of voice commands, task automation and natural language processing.

DevOps Backup Automation | Python, Bash, Linux

- Developed a Linux automation toolkit for scheduled backups, server health monitoring, retention management and infrastructure maintenance.

EDUCATION

Bachelor of Computer Science | Savitribai Phule Pune University (SPPU), Pune, India | 2020

- Final Year Project: AI-based Student Attendance System using Python and OpenCV with face recognition, automated record-keeping and PDF report generation.
